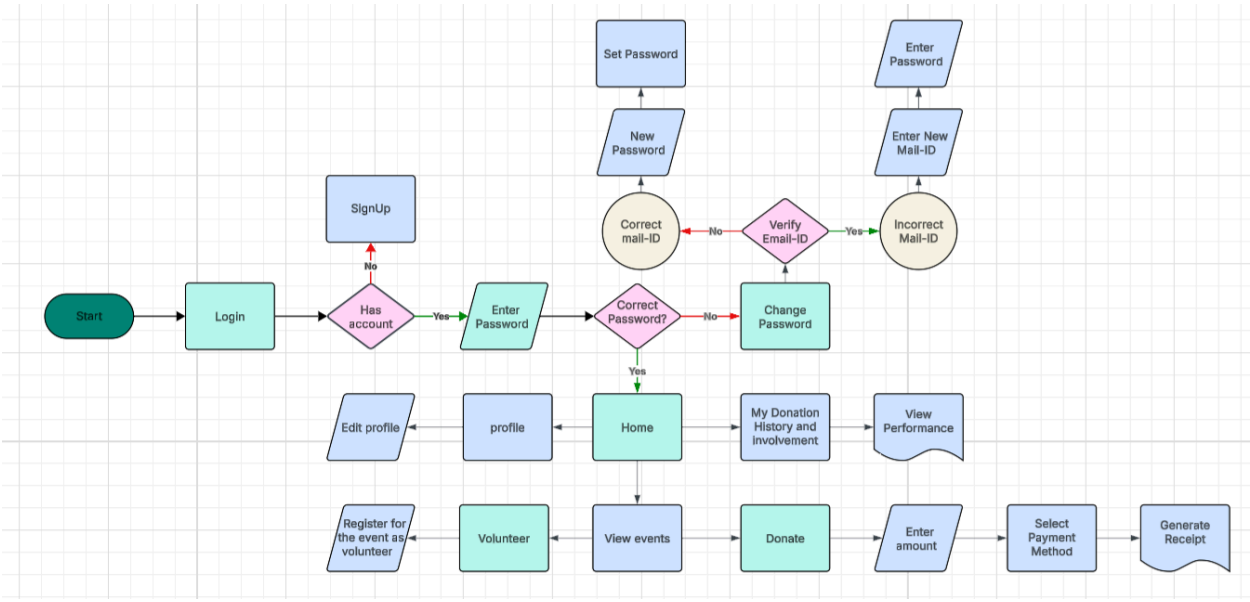
EXPERIMENT - 05

SHOBBIKA T 240701502

Conduct task analysis for an app and document user flows. Create corresponding wireframes using Lucidchart.

TASK ANALYSIS DIAGRAM:



Task Analysis Link :

USER FLOW DESCRIPTION:

The user flow diagram represents the complete working of the application.

Flow Explanation

- The flow begins with **Start** → **Login**
- Decision node: **Has an Account?**
    - No → Sign Up
    - Yes → Enter Password
- Password validation:
    - If correct → Home page
    - If incorrect → Change Password
- Email verification ensures correct user identity
- After login, the Home page acts as a central hub

From Home, user can:

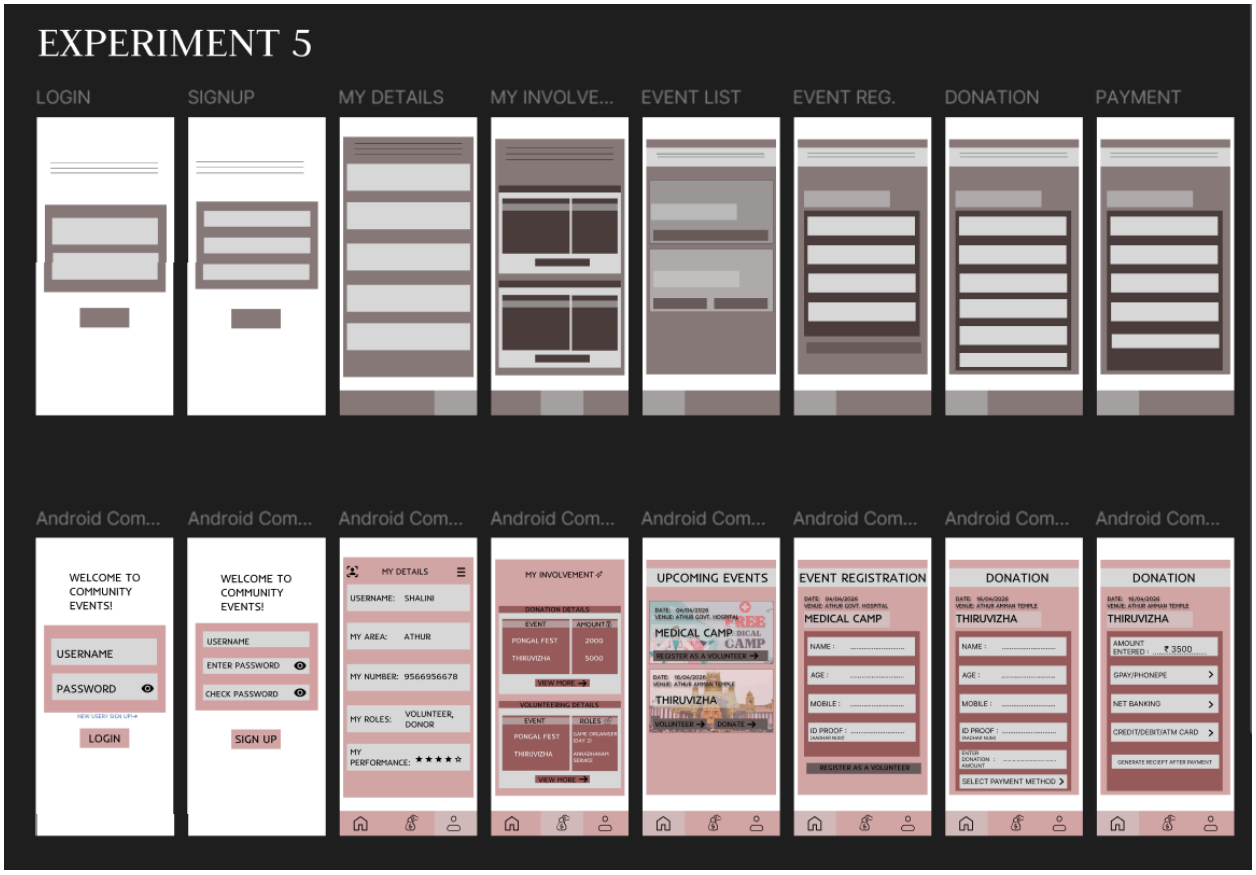
- Access Profile and Edit Profile
- View Donation History and Involvement
- View Performance
- Explore Events
- Register as Volunteer
- Make Donations

Flowchart Symbols Used

- Oval → Start/End
- Rectangle → Process
- Diamond → Decision
- Arrows → Flow direction

WIRE FRAME:

Prototype Link:
https://www.figma.com/design/cmhnhzg51Acx4AoyvGvc5n/UID-EXP-5---7?node-id=0-1&t=vDEiksc1Cz5mSTCb-1



Low-fidelity wireframes were created to represent the basic structure of the application screens.

Features of Wireframes

- Grayscale layout
- Minimal design (no styling or colors)
- Focus on structure and usability
- Use of placeholders instead of real data

SCREENS DESIGNED:

1. Login Screen

- Username field
- Password field
- Login button
- Link to Sign Up

2. Signup Screen

- Username input
- Password input
- Confirm password
- Sign Up button

3. My Details Screen

- Displays user information
- Includes fields like name, area, phone number
- Option to view roles and performance

4. My Involvement Screen

- Displays:
    - Donation details
    - Volunteering activities
- Shows event participation

5. Event List Screen

- Displays upcoming events
- Shows event details (date, location, description)

6. Event Registration Screen

- Input fields:

    - Name
    - Age
    - Mobile number
    - ID proof
- Register button

7. Donation Screen

- User details form
- Donation amount entry
- Input validation fields

8. Payment Screen

- Payment options:
    - GPay / PhonePe
    - Net Banking
    - Card payment
- Payment confirmation
- Receipt generation

CONCLUSION:

The task analysis and user flow were successfully designed using Lucidchart, and corresponding low-fidelity wireframes were created using Figma. The application structure and user interactions were clearly visualized.
