EXPERIMENT 6

SHOBBIKA T 240701502

Simulate the lifecycle stages for UI design using the RAD model and develop a small interactive interface.

RAD MODEL:

Users:
- Students (primary users)

System Features:
- User login
- Browse available events
- View event details
- Register for events
- View registered events
- Submit feedback

User Goals:
- Easily access event information
- Quickly register for events
- Provide feedback after participation

Pages created:
1. Login Page
2. Dashboard
3. Event List
4. Event Details
5. Registration Success Page
6. My Registrations
7. Feedback Page

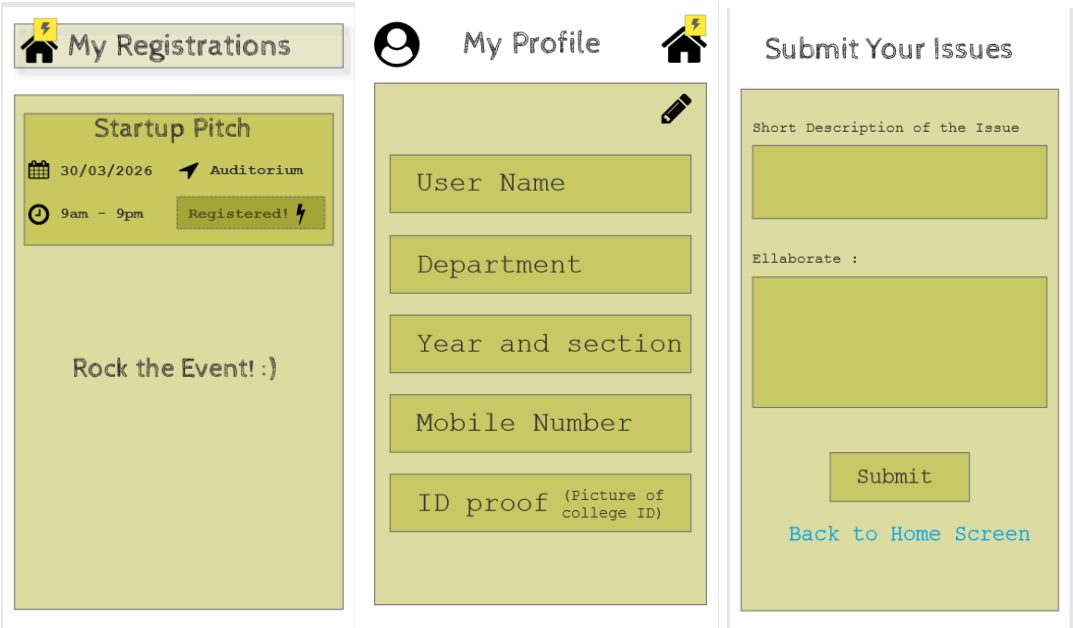
Registration Success!
Back To Home Screen



User Flow:
Login → Dashboard → Browse Events → Event Details → Register → Confirmation → View Registrations / Feedback

Design Elements Used:
- Text fields for input (username and password)
- Buttons for navigation
- Icons for better user experience
- Layout components such as rectangles and labels

Interactions Implemented:
- OnClick events to navigate between pages
- Login button redirects to dashboard
- Event selection opens event details
- Register button confirms event registration
- Navigation buttons connect all pages

The prototype allows users to simulate real interaction without backend functionality.

Screen 1: Login Page

Purpose: User authentication entry point.

UI Elements:

- Username field
- Password field
- Sign In button
- SignUp link

RAD Stage: Process Modeling + Application Generation

Interactive Behavior: Clicking "Sign In" validates empty fields; "SignUp" switches to registration screen.

Screen 2: SignUp Page

Purpose: New user registration.

UI Elements:

- Username
- Password
- Confirm Password
- Sign button

Validation: Password and Confirm Password must match.

Navigation: On success → redirects to Login.

Screen 3: Dashboard (Home Screen)

Purpose: Main landing after login.

Options:

1. View Event List
2. My Registrations
3. View My Profile
4. Submit Queries

RAD Stage: Business + Process Modeling

Screen 4: My Profile

Purpose: Display and edit user details.

Fields:

- User Name
- Department
- Year and Section
- Mobile Number
- ID Proof (College ID image upload placeholder)

Interactive: Editable fields, save option (implied).

Screen 5: List of Events

Purpose: Show available events with registration option.

Events Displayed:

Event	Date	Venue	Time	Action
Tech Hackathon	30/03/2026	Auditorium	9am - 9pm	Register Now
Figma Workshop	04/04/2026	Conference Hall	12pm - 2pm	Register Now

Interaction: Clicking "Register Now" shows success popup/screen.

Screen 6: Registration Success

Purpose: Confirm event registration.

Content:

- Success message
- "Back to Home Screen" button

RAD Stage: Testing & Turnover (feedback loop)

Screen 7: My Registrations

Purpose: View registered events.

Example:

Startup Pitch – 30/03/2026, Auditorium, 9am-9pm
Status: Registered! 🎉

Screen 8: Submit Queries / Issues

Purpose: User support.

Fields:

- Short description of the issue
- Elaborate (long text)
- Submit button
- Back to Home Screen link
